The power of teamwork

"Behind every great human achievement, there is a team."

From medicine and space travel, to disaster response and pizza deliveries, our products help teams all over the planet advance humanity through the power of software. Our mission is to help unleash the potential of every team through open work.

Atlassian Platinum Solution Partners in Customised Development, Implementation, Consultancy, Plugin Development, Training and 24x7 Support Services for Atlassian's JIRA, Confluence, Bitbucket Having seen simple installations failing due to various reasons we provide the service of installation support. Our team can do either local or remote installation and take the hassles out of your head. This saves in money and time as our experts are able to configure jira / confluence and other products. It helps that we are experts in Installshield as training and consultancy partner.

DEVOPS CONSULTING

Bring Communication, Collaboration and Transparency together.

DevOps Services Methodology

The best customer experiences are built with Zendesk.

The Zendesk platform is where the action is. Customer interactions across phone, chat, email, social media, and any other channel you can imagine, all come together in one place.

Zendesk products work right out of the box, with powerful features and functions to help any business improve their support operations. Our platform is designed to grow and scale, so it works for companies of any size—from startup to enterprise.

Nagios[®]

Nagios is one of the most Powerful IT Infrastructure Monitoring System.

In simple terms, Nagios monitors your entire IT infrastructure to ensure systems, applications, services, and business processes are functioning properly. Proactively, Nagios can alert technical staff of the problem, allowing them to begin remediation processes before outages affect business processes, end-users, or customers.

With Nagios, you are better equipped to tackle the unseen breakdowns well in advance and take precautionary measure to rectify them.

The enterprise cloud is complex, monitoring it shouldn't be.

Understand the performance of your apps, Infrastructure, all users and more, in a single intelligence platform.

Auto-discover and baseline your entire IT ecosystem in minutes. Get full insights into user experience and business impact. Easily monitor and manage application performance and cloud infrastructure. Resolve application problems before your customers are impacted.

SMARTBEAR

Unleash Your Passion to Create Great Software with a SmartBear Tool.

SmartBear is the leader in software quality tools for teams supporting over 6 million developers, testers and operations teams and over 22,000 companies in 194 countries use SmartBear products to deliver the world's best applications. The company's products help deliver the highest quality and best performing software possible while helping teams ship code at nearly impossible velocities. With products for API testing, UI testing, code review and performance monitoring across mobile, web and desktop applications, SmartBear equips every development, testing and operations team member with the tools to ensure quality at every stage of the software cycle.

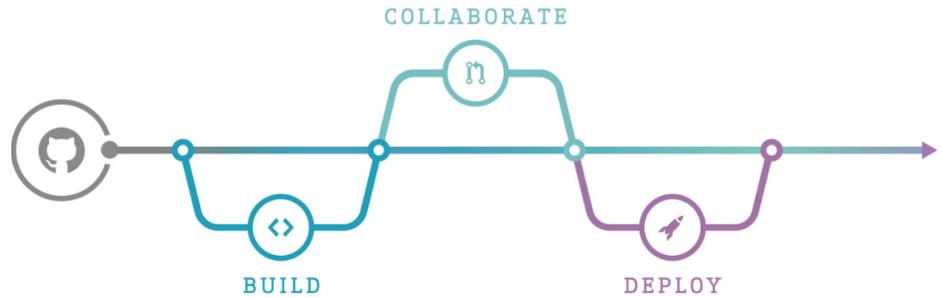

Build and ship software, faster.

Build software, share your work, discuss changes, and get feedback in one place. Collaboration and code review all happen in pull requests—living conversations that streamline the way people propose changes and give feedback on projects.

You can use GitHub Enterprise to rally developers, product managers, support specialists, and everyone else who needs to be involved by mentioning their username or sharing a URL.

GitHub

Whichever technologies you use, there's a JetBrains tool to match.

Strived to make the strongest, most effective developer tools on earth. By automating routine checks and corrections, our tools speed up production, freeing developers to grow, discover and create.
